

STEM

STEM Vision

STEM (Science, Technology, Engineering, and Mathematics) in the Bethel Public Schools is an interdisciplinary approach to learning. Students explore and problem solve with an authentic scenario challenge connected to the real world. Students engage in inquiry and productive struggle and develop a willingness to take risks, communicate their ideas, and seek ways to improve their community and world around them.

In 2017, we launched our first K-12 STEM EXPO and we are looking forward to seeing it grow each year. Students and community members shared their STEM interests with project exhibitions, hands on demonstrations, activities and presentations.

In 2018, we added "A" for the Arts. All students are invited and encouraged to participate in the STEAM Expo!

Want to get your student started in STEM activities beyond the school day? Check out these curated resources to engage all kids in STEM!
